

Assignment 4

Tanmoy

March 2022

Monte-Carlo Simulation

for "N = 128, rho = 0.8442, Temp = 0.728, max-del = 1.5"

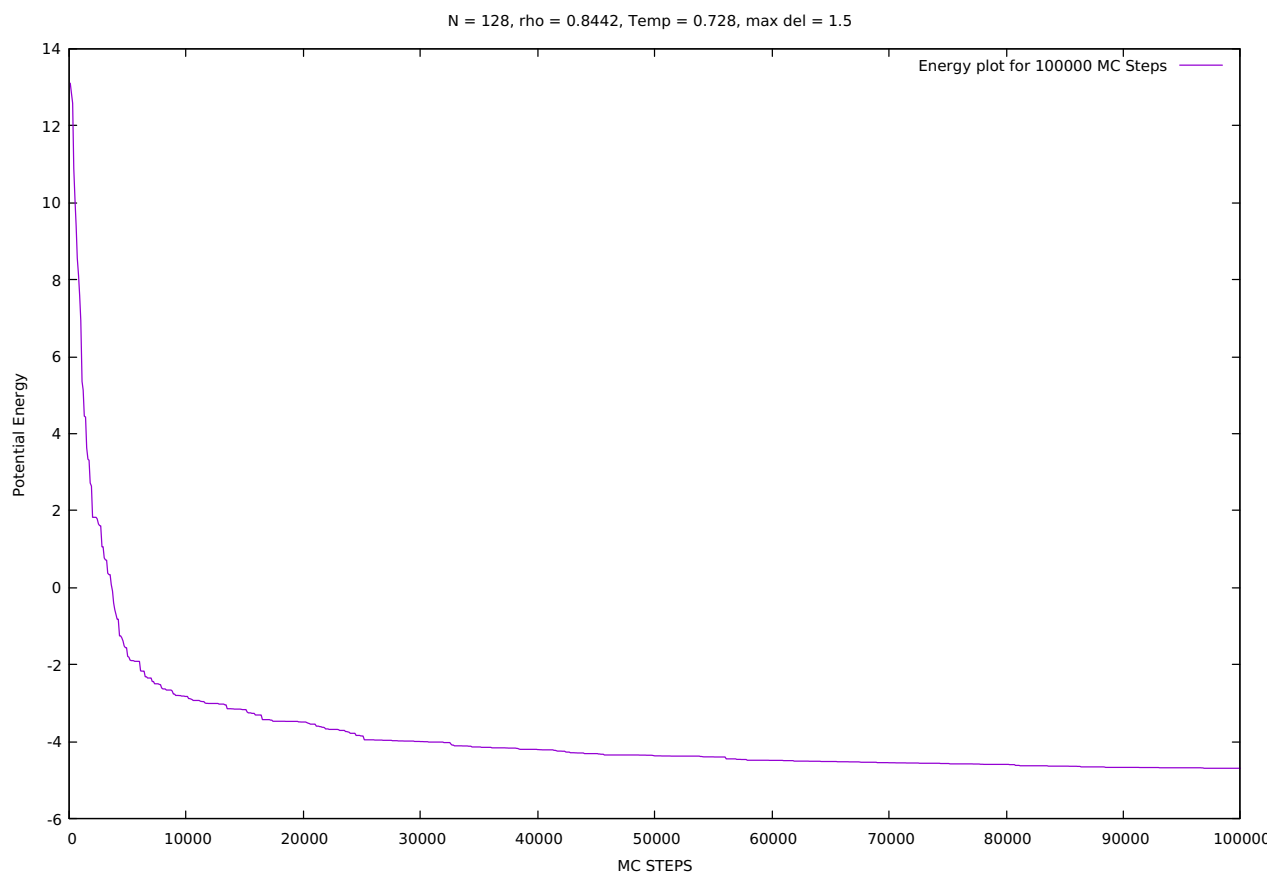

Figure 1: Mc Step = 100,000

Initial Potential Energy: 13.329583343241142
Final Potential Energy: -4.6820107207724728
Final Potential Energy(from LJ) : -4.6820107411744329
The no. of accepted moves : 317.00000000000000
The acceptance ratio : 3.1700000000000001E-003
Program run time : 0.5883220000000001

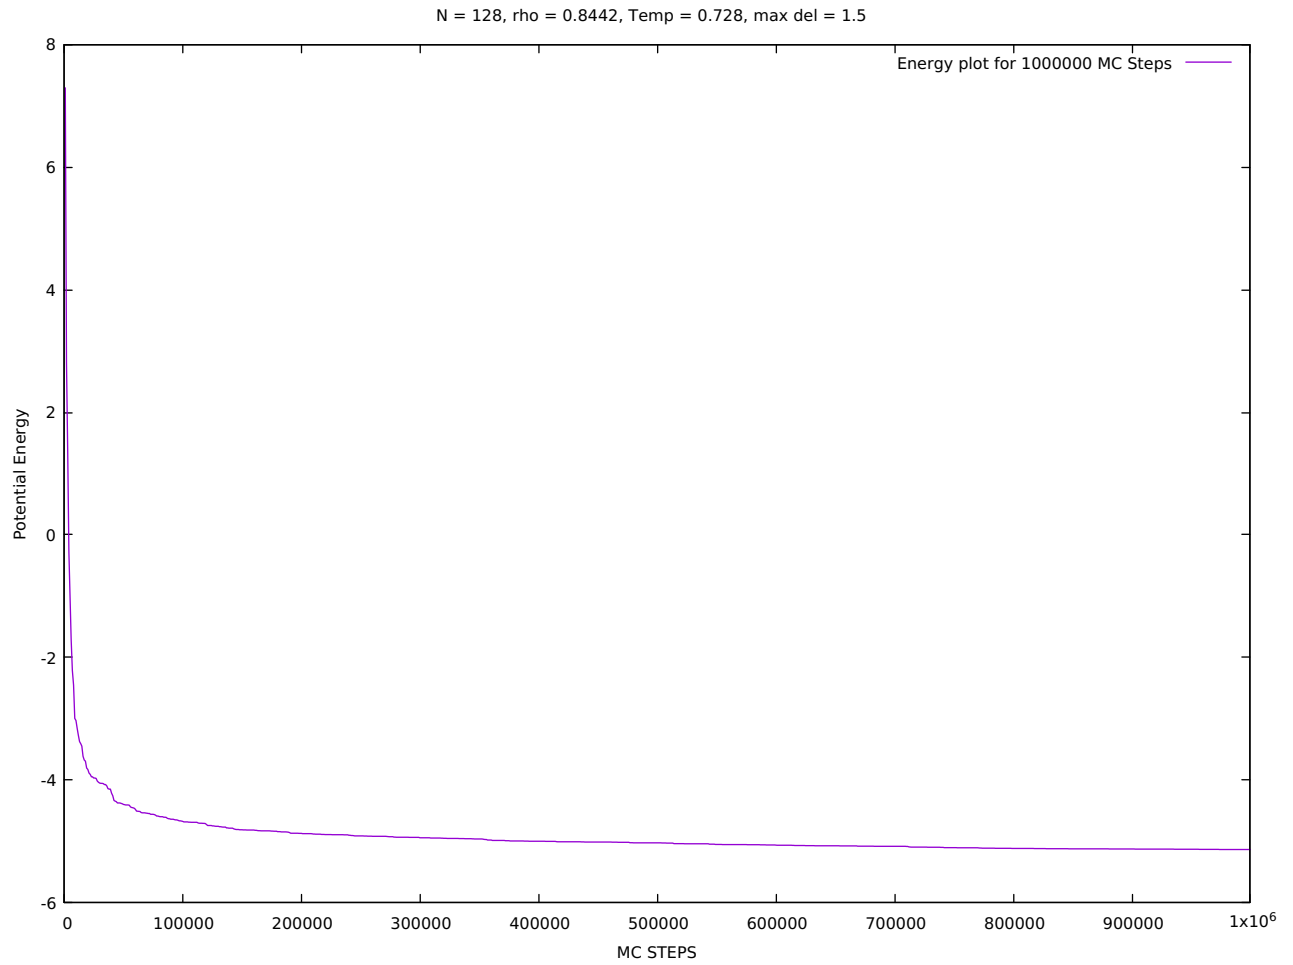

Figure 2: Mc Step = 1000000

Initial Potential Energy: 13.329583343241142
 Final Potential Energy: -5.128693151250478
 Final Potential Energy(from LJ) : -5.1286931551246218
The no. of accepted moves : 592.00000000000000
The acceptance ratio : 5.9199999999999997E-004
 Program run time : 4.2376269999999998
